N-acyl-L-amino acid amidohydrolases homolog lmol012 [imported] - Listeria monocytogenes C; Species: Listeria monocytogenes C; Species: Listeria monocytogenes C; Species: Listeria monocytogenes C; Species: AD1201
C; Accession: AD1201
R; Glaser, P.; Frangeul, L.; Buchrieser, C.; Amend, A.; Baquero, F.; Berche, P.; Bloecker.; Dominguez-Bernal, G.; Duchaud, E.; Durand, L.; Dussurget, O.; Entian, K.D.; Fsihi, H. D.; Jones, L.M.; Karst, U.
Science 294, 849-852, 2001
A; Authors: Kreft, J.; Kuhn, M.; Kunst, F.; Kurapkat, G.; Madueno, E.; Maitournam, A.; May, C.; Schlueter, T.; Simoes, N.; Tierrez, A.; Vazquez-Boland, J.A.; Voss, H.; Wehland, A; Fitle: Comparative genomics of Listeria species.
A; Reference number: AB1077; MUID:21537279; PMID:11679669
A; Accession: AD1201
A; Status: preliminary
A; Molecule type: DNA
A; Residues: 1-371 <GLA>
A; Cross-references: UNIPROT:0878A0; UNIPARC:UPI00000CF129; GB:NC_003210; PIDN:CAC99090.1
A; Experimental source: strain EGD-e
C; Superfamily: Hippurate hydrolase
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       algral transduction histidine kinase Cj0793 [imported] - Campylobacter jejuni (strain NC (Species: Campylobacter jejuni (c.)Species: Campylobacter jejuni (c.)Species: Campylobacter jejuni (c.)Bate: 31-Mar-2000 #sequence_revision 31-Mar-2000 #text_change 09-Jul-2004 (c.)Accession: A81351 (c.)Accession: A81351 (d.)Accession: A81351 (d.)Accession: A81351 (d.)Accession: A81351 (d.)Accession: A81250; Mungall, K.; Ketley, J.M.; Churcher, C.; Basham, D.; Chillin (c.)Accession: A81250; Mungall, K.; Ketley, J.M.; Churcher, C.; Basham, D.; Chillin (d.)Accession: A81351 (d.)Ac
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            A;Status: preliminary
